

Senior Data Engineer

Full-Time | Dubai, UAE | 6+ Years Experience

Ref: XB-DE-2026-04 | Closing: 31 May 2026 | Talent Acquisition: careers@xebia.com

Company	Xebia (Databricks Gold Partner)	Location	Dubai, UAE
Department	Data & AI Practice – MEA	Travel	Up to 20% regional
Reporting To	Data & AI Lead, MEA	Salary Band	AED 18,000–26,000/month

Role Summary

We are looking for a Senior Data Engineer with 6+ years of hands-on experience to join Xebia's rapidly growing Data & AI practice in the MEA region. You will be embedded in client engagements across aviation, FMCG, and hospitality verticals — designing, building, and optimising large-scale data platforms on Databricks, Azure, and GCP. You will be expected to own technical delivery end-to-end, mentor junior engineers, and contribute to presales solution design.

Key Responsibilities

- Design and implement robust ELT/ETL pipelines using Apache Spark, Databricks, and Azure Data Factory.
- Lead Unity Catalog migrations including schema governance, lineage mapping, and cutover planning.
- Build and maintain Delta Lake architectures (Bronze / Silver / Gold medallion pattern).
- Develop data models for analytical workloads — dimensional, Data Vault 2.0, and OBT patterns.
- Integrate with operational systems including SAP, Salesforce, Dynamics CRM, and REST APIs.
- Implement data quality frameworks using Great Expectations or equivalent tooling.
- Collaborate with data scientists and ML engineers to productionise ML pipelines on Databricks ML.
- Conduct code reviews, establish best practices, and mentor a team of 2–4 engineers.
- Contribute to SoW scoping, effort estimation, and solution architecture during presales.
- Produce client-facing technical documentation: architecture diagrams, runbooks, and HLD/LLD.

Must-Have Requirements

- 6+ years of professional data engineering experience, with at least 3 years on cloud platforms.
- Expert-level proficiency in Python and PySpark for large-scale data transformation.
- Hands-on Databricks experience: Delta Lake, Workflows, Unity Catalog, MLflow.
- Strong SQL skills across analytical databases (Synapse, BigQuery, Snowflake, or equivalent).
- Experience with orchestration tools: Apache Airflow, Azure Data Factory, or Databricks Workflows.
- Solid understanding of CI/CD for data pipelines: Git, Azure DevOps, or GitHub Actions.
- Proven experience delivering in an Agile/Scrum environment within a consulting or SI context.
- Databricks Certified Data Engineer Associate (or higher) — or ability to obtain within 60 days.
- Excellent English communication skills; ability to present to technical and non-technical stakeholders.
- Right to work in the UAE (Residence Visa or eligibility for employer sponsorship).

Nice-to-Have / Differentiators

- Experience with GenAI / LLM integration: LangChain, Amazon Bedrock, Azure OpenAI, or similar.
- MDM / data harmonisation exposure across multi-ERP environments.
- GCP-native experience: BigQuery, Dataflow, Pub/Sub, Composer.
- Familiarity with aviation or loyalty data (Amadeus, SITA, PNR structures).
- Databricks Certified Data Engineer Professional or ML Professional certification.
- Arabic language proficiency (beneficial for KSA engagements).

Technology Stack You Will Work With

Category	Technologies
Data Platform	Databricks, Apache Spark, Delta Lake, Unity Catalog
Cloud	Azure (primary), GCP, AWS
Orchestration	Azure Data Factory, Databricks Workflows, Apache Airflow
Languages	Python, PySpark, SQL, Scala (advantage)
Streaming	Azure Event Hubs, Apache Kafka, Spark Structured Streaming
CI/CD & DevOps	Git, Azure DevOps, GitHub Actions, Terraform
Visualisation	Power BI, Looker, Databricks SQL
GenAI	Amazon Bedrock, Azure OpenAI, LangChain, Vector DBs

What We Offer

- Competitive tax-free salary with performance bonus (10–15% of annual CTC).
- Databricks certification sponsorship and access to Udemy Business learning library.
- Exposure to marquee GCC clients across aviation, F&B, hospitality, and government.
- Flexible hybrid working model — 3 days client site, 2 days remote.
- Medical insurance (employee + family), annual flights, and visa sponsorship.
- Fast-track career progression within a Databricks Gold Partner ecosystem.

How to Apply

Submit your CV and a brief cover note (max 300 words) to careers@xebia.com with the subject line **REF: XB-DE-2026-04 | [Your Name]**. Shortlisted candidates will be contacted within 5 business days for an initial screening call.
